

## **Addition to the Milestone Brewery Kit Range**

Muntons are pleased to announce the release of a totally new beer kit - Milestone Raspberry Wheat Beer.

This 3kg twin can boxed beer kit is a new addition to the existing Milestone brewery kit range and has been made in collaboration with the Nottinghamshire based Milestone brewery.

Raspberry wheat beer has been produced using a blend of wheat and barley malts with the addition of raspberry flavour sachet to emulate this popular style of continental beer.

Milestone Brewery was established by pub landlord, beer connoisseur and businessman Ken Munro and is a craft brewery producing fine flavoursome ales, which has won many prestigious awards over the years.

The new Milestone Raspberry Wheat Beer brewery kit produces 32 pints of strong, continental style fruit beer with a typical alcohol strength of 5.6 ABV. The RRP for this kit is £23.48.

This new brewery kit will be available from Muntons during November 2010. So place your orders now to avoid disappointment!
