

## Congratulations to Julie List

Julie List, Muntons Food Safety and Quality Technologist, achieved an impressive 2:1 BSC honours for Applied Biology with Human Biology at the University of East Anglia in September 2007.

Congratulations must go to Julie on this achievement and on her commitment. In total it took Julie eight years to complete the course in her spare time, taking leave from work one day per week to attend tutorials and lectures - a course that would normally take nine years to complete in this part time way.

This qualification enables Julie to fulfil the role of food safety technologist within Muntons, from her previous position of laboratory analyst.

Alan Ridealgh, Managing Director of Muntons plc, said " I was particularly pleased on hearing of Julies achievement. She was determined to fulfil her ambition and attaining her degree is proof of her commitment. This will prove beneficial for her and at the same time help with our progress in developing our food safety standards."
