

Muntons PRESS RELEASE

Going For Gold at Muntons

No matter how long it has been since you left school, there is always room for improvement and more skills to learn. Age is no barrier for learning anymore! 20th August saw a great display of qualifications achieved by the personnel of Muntons plc.

A certificate presentation took place at the offices in Stowmarket, Suffolk.

Managing Director, Alan Ridealgh presented the certificates to each individual, which was photographed and celebrated afterwards by a buffet lunch of malted ingredients.

Going with the theme of the Olympics, which has consumed all of our lives recently, I can proudly announce those who have achieved an improvement in their personal best for team Muntons. Our very own gold medallist Trevor Conway, Liquid Extract Team Leader, received three certificates for his qualifications in 'Hands on COSHH, NVQ Level 2 and 3' He frequently receives certificates at the company certificate presentations throughout the whole year, proving to be one of Muntons consistent performers.

Captain of the lady's team Patsy Murphy, Muntons Sample Co-ordinator, is the first lady to successfully complete NVQ Level 2 from the production plant.

Speaking to Patsy after the presentation she expressed great satisfaction in completing the course; she said 'within the course you can specialise in five areas, which you select yourself, so you can relate it back to your job. I chose dispatching goods, improvements in the workplace, moving materials within the workplace, maintain quality of goods and produce individual packs. I have found that this course has helped me really understand my job role and has enabled me to develop and expand my job role going forward.'

Each year our Stowmarket headquarters produces in excess of 70,000 tonnes of malt and 27,000 tonnes of malt extract, with a capacity to manufacture 6,000 tonnes of spraydried and band dried extract per year. We supply over 3,000 tonnes into the home beer-making market and have a 10,000 tonne malt flour milling and malted cereal flaking operation.
